1800 Series

Hot-Water Pressure Washers

ALKLEAN INDUSTRIES, INC.

"ALWAYS CLEAN . . . ALWAYS ALKLEAN"

Customize Your Cleaning

Controls for the pump, burner and detergent are easily accessible.

Stainless steel coil skin provides extra durability to withstand overspray.

Control panel provides access to the main controls. Remove the front panel to access the Smart Relay for secured control of desired operating settings, such as auto start/stop functionality.

Upright, vertical coil delivers high efficiency and maintains constant temperature using oil, natural gas or optional LP Gas.

Pressure relief valve protects the machine and user from excessive pressure.

The **Smart Relay** allows the washer to be customized to your washing needs.

Adjustable upstream detergent injection ensures high-pressure sudsing for better cleaning.

Elevated gas valve protects valve from water damage, and is located at the back corner for easy installation and service.

Burner assembly pivots down to allow access to burner ring and pilot assembly for maintenance.

Insulated Hotsy trigger gun and **insulated wand** with ergonomic, adjustable side handle.

Sleek side and front panels are easily removed for routine maintenance and service access.

50-ft. length of high-pressure hose for easy maneuverability around a large working area.

15 HP Baldor 230V 1PH or 208V, 230V, 460V or 575V 3PH electric motor comes with thermal overload protection and manual reset (Note the 1812SS has a 10 HP Baldor motor).

Quick disconnect stainless steel nozzles are color coded for quick changing between 0°, 15°, 40° spray nozzles.
